

Callahan Remodel

N.E. Portland, Oregon

Remodel of existing 1923 cottage style house to include expanded/rehabbed 2nd floor consistent with the original style. Working within the context of a master plan for the entire house, the first phase work included enlarged dormer, rehabbed master bedroom and master bath, added 2nd bath, and re-configured guest room. Scope of work included architectural design and construction. In the master bedroom a sitting area with a bank of south facing windows was added. The master bath incorporated a new double vanity, glass and tile shower, and built-in tub. The new bathroom included tile and glass shower and pedestal lavatory. Additional work was also required in the main floor and basement to accommodate the dormer addition.
