

# UTAH LOW INCOME HOUSING COMPETITION HONORABLE MENTION

Salt Lake City, Utah

14 units were designed for a one acre site located in a predominantly single family neighborhood. One and two story duplexes were designed to look like single family residences clustered around an internal cul-de-sac. Units facing the street are senior citizen apartments. Family units were located off the cul-de-sac. One duplex was designed to be transformed into a daycare center. A neighborhood park which included community gardens and tot lot was provided in the sewer easement at the rear of the site.
